

Flexitanks

Bulk Liquid Shipping - ISO Box Container Tanks

Heavy duty and durable, Flexitanks are suitable for various contact times and are available for multiple uses or light duty single use tanks, “one trippers”.

Utilizing Flexitanks in refrigerated box containers, allows shippers to transport liquids requiring controlled temperatures. Custom Reefer style tanks offer the ability to ship two materials in one container.

Compatibility:

A vast variety of materials, sizes and configurations are available. We recommend Material Safety Data Sheets (MSDS) and trip duration (total contact time) be provided to ensure compatibility and the most efficient use of materials. This data is kept in strictest confidence and is only used to provide the expert advice and warranty to meet your needs. While the tanks are located in the United States, strategic partnerships we’ve created allows us to service your needs on a global basis.

| <u>Standard Flexitank Features:</u> | |
|--|--|
| <ul style="list-style-type: none"> • Quality construction for safe liquid transportation. • Converts standard dry cargo ISO shipping containers into a one-way bulk liquid transport system. • Standard 50 mm (2 inch) fill/drain fittings with ball valve, dust cap and ball valve with male cam lock. • Center vent non-pressure relief cap (Alternatives available at additional cost). • Food grade approved materials are certified. | <ul style="list-style-type: none"> • Each tank is uniquely numbered for traceability and packaged safely for shipping. • More economical than other bulk packaging options similar to IBCs . • Disposable or reusable depending on your needs. • Product handling becomes more versatile with decreased landed material cost. • Best of all — EASY TO USE! |
